CGPA: 8.60/10

---

## INTERNSHIPS

**Machine Learning Developer**

Ivety.AI (Bangalore)

Jan 2019 - Feb 2019

I've created few prediction algorithms in machine learning and also created a react form and a bot in this tenure too.

**Web Development**

Amazetrack (Virtual) Jan

2018 - Feb 2018

I have created several WordPress websites and android applications during this tenure.

---

## TRAININGS

### IoT With Python Programming

Microsoft-Google (Bangalore)

Sep 2018 - Sep 2018

I have learnt IoT with Python programming and performed few projects regarding the knowledge I have acquired through this training.

---

## PROJECTS

### Customer Service Provider Application

Dec 2018 - Dec 2018

<https://drive.google.com/open?id=1u9R5PiHoJM0SOSD12BEKniUluVyOdo1s>

This was an internship screening application which I have done in 2018. It is not a complete and functional project, however, it is a perfect blueprint to make it a functional project.

### Pacman Game

Feb 2018 - May 2018

<https://github.com/AtulChandran/pacman>

This is a game involving OpenGL library functions which I have learned in Computer Graphics during my Engineering Course.

### Books

Jan 2018 - Feb 2018

<https://drive.google.com/open?id=15uQxZa3SDLJLp0nmE3N-DC2w6J0IJ8OG>

This zip file has 3 applications, namely Story Book Application, Poems Application and Excerpts Application. These 3 were a base idea to my final project involving Data Mining.

### Cricket Quiz

Sep 2017 - Feb 2018

<https://github.com/AtulChandran/cricketquiz>

I have developed this Cricket Quiz application using full stack web development. This was my first big project in PHP

### Colour Game

Jan 2018 - Jan 2018

<https://github.com/AtulChandran/Colour-Game>

This is a basic Colour Game project where you need to guess the correct colour box according to the RGB colour code.
